- French (Native language)
- Dutch (Bilingual)
- English (Fluent)

PROFILE

Junior application developer with experience in programming and web technologies. I have had the opportunity to work with languages such as Java, Kotlin, PHP, JavaScript, and C/C++, as well as frameworks like React, Spring, Django, and Laravel. My background has allowed me to work on both academic and professional projects, including an internship focused on SAP integration. These experiences enabled me to apply the skills I acquired at school and strengthened my ability to learn new tools quickly. I now wish to bring these skills to a professional environment where I can continue to grow and give my contribution.

EXPERIENCE
